Chic or Shabby Chic?

Do you prefer a perfect finish or a more distressed look.

Chic? Not shabby? You will still need to seal your painted item to protect the finish. You can either use a Wax or a varnish. With waxes there are a variety of colours and finishes.

To apply wax use a special wax brush, soft cloth or sponge using a light touch. Work in good light on a small area at a time. Don't apply too much or it will become tacky, wipe away any excess. If applying multiple coats allow 36 hrs between applications to allow the wax to cure.
